

SHV Jack to SHV Plug Tee Adapter

RF Adapters Technical Data Sheet

PE9249

Configuration

- SHV Jack Connector 1
- SHV Plug Connector 2
- 50 Ohms
- Tee Body Geometry

Features

- Max VSWR of 1.2:1 up to 300 MHz
- SHV Interface compliant with MIL-STD-348
- Silver Plated Beryllium Copper Contact
- Contact Plating per QQ-S-365

Applications

- General Purpose Test

Description

Pasternack's PE9249 SHV jack to SHV plug tee adapter is part of our full line of RF components available for same-day shipping. Our SHV tee adapter has a jack-plug-jack gender configuration. Our SHV tee connector operates to 300 MHz. The Pasternack RF adapter provides excellent VSWR of 1.2:1 maximum. Tee adapters (also called tee connectors) are three port devices that can be used to split or combine a signal. Unlike power dividers/combiners, however, they do not provide matched impedance at all ports.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.

Electrical Specifications

Description	Minimum	Typical	Maximum	Units
Frequency Range	DC		300	MHz
VSWR			1.2:1	

Electrical Specification Notes:
Values at 25°C, sea level.

Mechanical Specifications

Size	
Length	1.712 in [43.48 mm]
Width	1.372 in [34.85 mm]
Height	0.57 in [14.48 mm]
Weight	0.055 lbs [24.95 g]
